

APPENDIX K

Karlo Fen State Nature Preserve

KARLO FEN

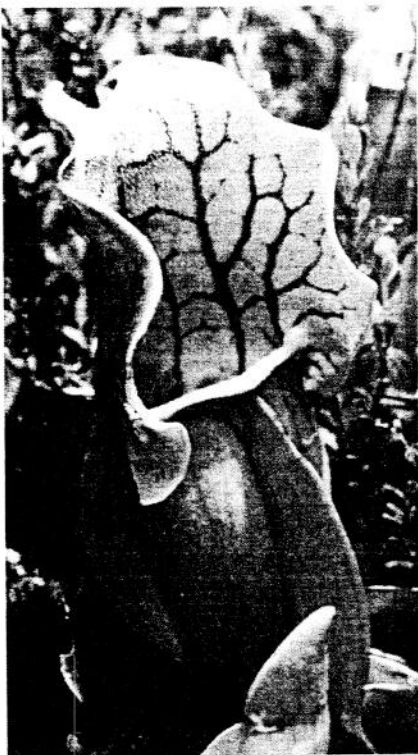

15 ACRES

Summit County
Green Township

Significant Features: Boreal and prairie fen species, including rose pogonia and calopogon orchid, pitcher-plant and round-leaved sundew.

ALKALINE FEN

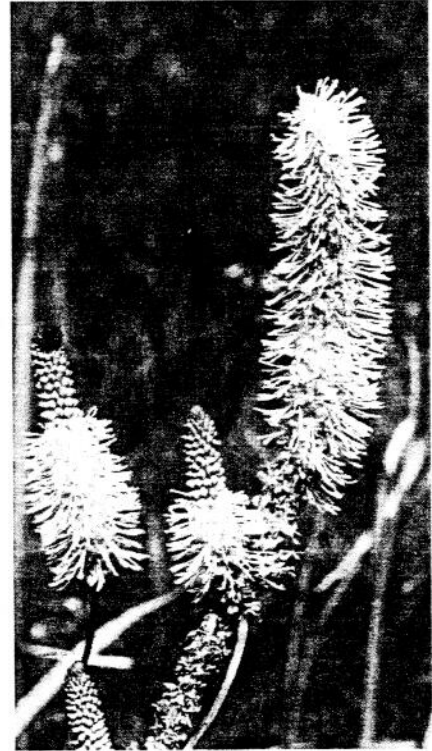

Although small, Karlo Fen supports an unusually rich diversity of northern as well as prairie fen species. Spotted turtles have also been reported from this fen. Some of the more interesting species of plants which can be seen here include round-leaved sundew, northern pitcher-plant, tamarack and calopogon as well as rose pogonia orchids.

Northern Pitcher-Plant
(*Sarracenia purpurea*)

Rose Pogonia
(*Pogonia ophioglossoides*)

Canada Burnet
(*Sanguisorba canadensis*)

LOCATED approximately 12 miles south and east of Akron. From I-77, exit on Arlington Road and proceed south 3 miles to East Nimisila Road, then west 1 mile to Christman Road. Access is by permit only from the Division.
